Ontario Metal Roofing Sales

ONTARIOMETALROOFINGSALES.CA

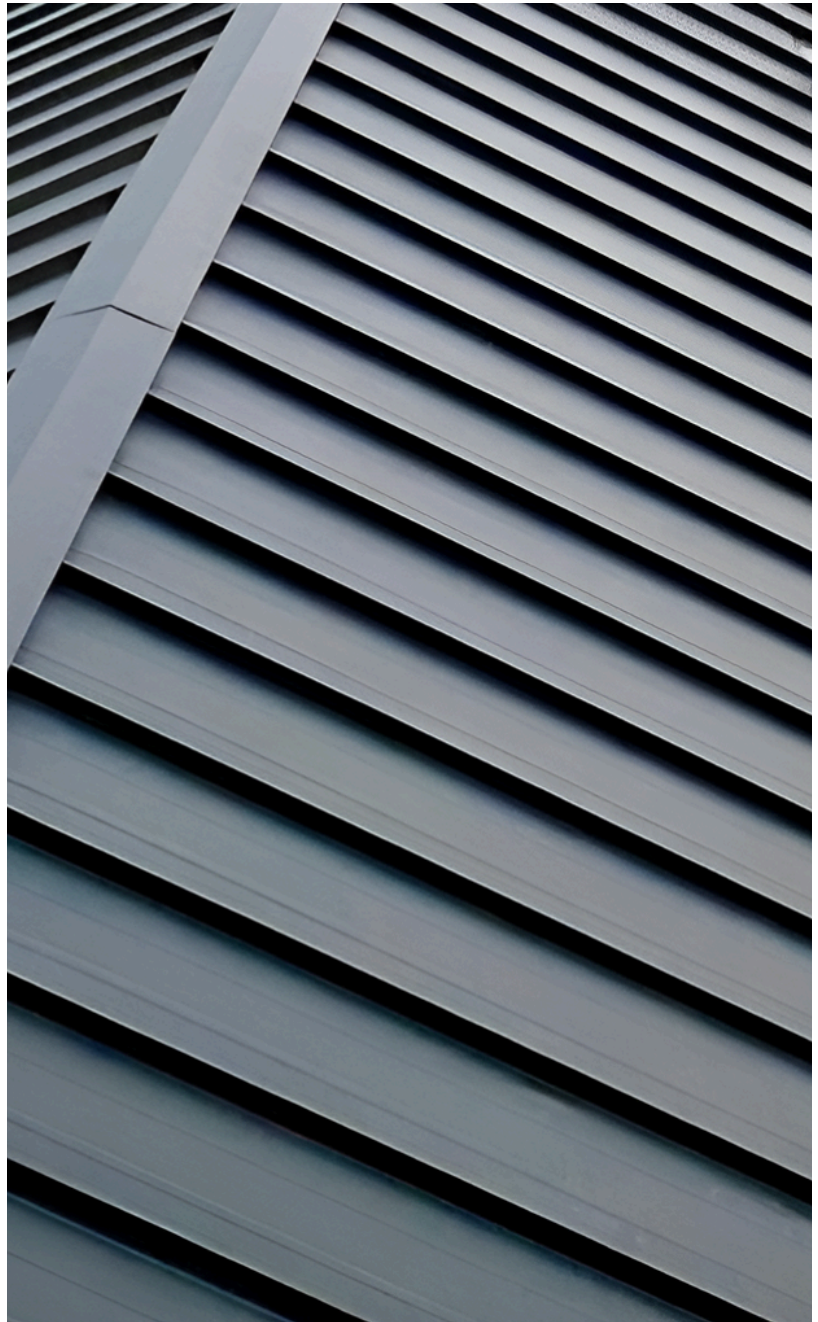

About Us

At Ontario Metal Roofing Sales, excellence is our standard, and we use the best materials paired with exceptional quality control processes to ensure that every product we manufacture exceeds standards. Our customers are at the heart of everything we do. We prioritize your needs and satisfaction through exceptional service, support, and tailored solutions. Our products are made to last, offering long-term protection and reliability. We continuously seek out and implement the latest technologies and materials to improve product performance and customer satisfaction. We ensure that all our products are safe for both installers and end-users, adhering to strict safety regulations throughout our manufacturing processes. We take accountability for the impact of our products and practices on the environment and customers. The OMRS team consists of dedicated professionals who are passionate about our products and customer service. From our skilled technicians to our knowledgeable customer support staff, each member is committed to providing you with the best possible experience. Our collective expertise and commitment to our values set us apart in the industry. Our extensive profile catalog features a diverse range of metal roofing, siding and soffit options, designed to meet various aesthetic and functional needs. Whether you're looking for modern elegance or classic charm, our products are crafted to withstand the toughest conditions and provide long-lasting beauty and protection.

Mechanical Lock Standing Seam

Superior protection against the elements.

Mechanical Lock Standing Seam is a type of metal roofing and siding system characterized by its durable and weather-resistant design. It features vertical panels with raised seams that interlock through a mechanical seaming process, creating a watertight seal. This profile is popular for its sleek, modern appearance and its ability to withstand harsh weather conditions, making it ideal for both residential and commercial buildings. One of the standout features of the Mechanical Lock Standing Seam profile is its sustainability. The panels are made from recycled metals like aluminum and steel, which themselves are fully recyclable at the end of their lifespan. Additionally, the reflective properties of metal roofing can enhance energy efficiency by reducing cooling costs, making it an eco-friendly choice for environmentally conscious building projects. The Mechanical Lock Standing Seam is also known for its longevity and low maintenance requirements, as well as its capacity to accommodate thermal expansion and contraction, ensuring a secure and lasting installation.

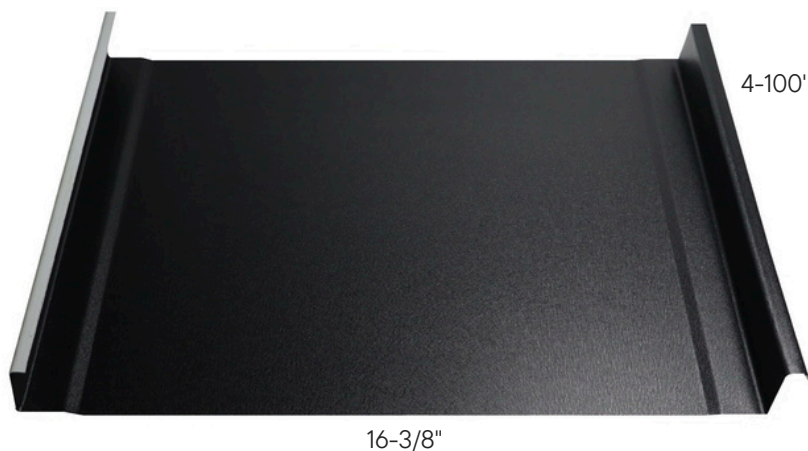

Features

- Roofing and siding profile
- Concealed fasteners
- 24 & 26 gauge
- 40 year limited paint warranty
- Offered with or without strengthening ribs
- Impact, weather and fire resistant
- Offered in textured and gloss finish options
- 1/12 minimum roof pitch
- 55% Aluminum-zinc alloy coated steel

Snap Lock Standing Seam

Seamlessly strong, effortlessly efficient.

Snap Lock Standing Seam roofing and siding is a popular choice for both residential and commercial buildings, offering a combination of aesthetic appeal and practical benefits. This profile features panels that snap together without the need for mechanical seaming, simplifying the installation process while still providing a secure and weather-resistant seal. Snap Lock Standing Seam panels stand out due to their use of recyclable materials, like aluminum and steel, which can be repurposed at the end of their service life. The reflective surface of these metal panels helps to minimize heat absorption, contributing to lower energy consumption for cooling. This energy efficiency, coupled with the long lifespan and minimal maintenance requirements of metal roofs and siding, makes the Snap Lock Standing Seam profile a great choice for your roofing or siding needs.

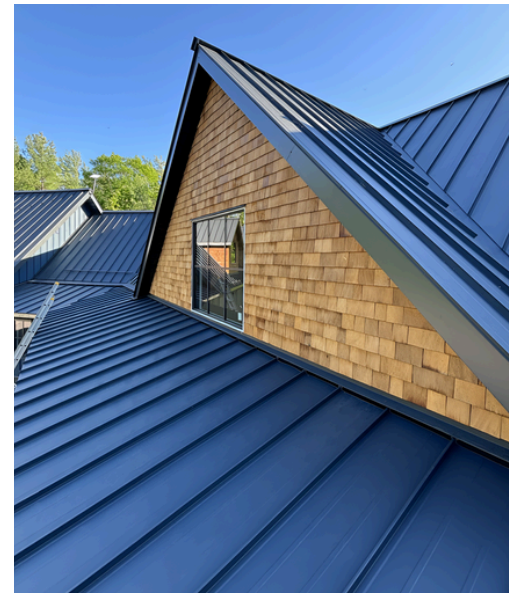

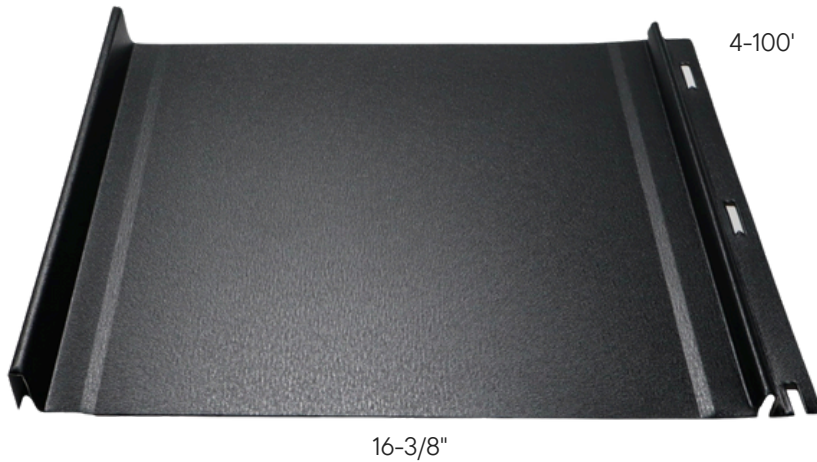

Features

- Roofing and siding profile
- Concealed fasteners
- 24 & 26 gauge
- 40 year limited paint warranty
- Offered with or without strengthening ribs
- Impact, weather and fire resistant
- Offered in textured and gloss finish options
- 3/12 minimum roof pitch
- 55% Aluminum-zinc alloy coated steel

Metal Shingles

Timeless beauty paired with superior protection.

Our Metal Shingles offer a contemporary and permanent roofing solution. This profile combines strength, cost-effectiveness, sustainability, and aesthetic appeal. These shingles are made from durable metals like steel or aluminum, offering superior resistance to harsh weather conditions, including heavy rain, snow, and high winds. Their longevity and minimal maintenance needs make them a cost-effective option over time, as they can last significantly longer than traditional asphalt shingles.

OMRS Metal Shingles are made from recycled materials like aluminum and steel that are fully recyclable at the end of their life span. Additionally, their reflective properties help improve energy efficiency by reducing cooling costs. Our experienced shingle technicians ensure exemplary products to help you get the job done right. The Metal Slate Shingles feature a 4-way interlock and direct-to-deck installation, making them easy to install. Their impact and fire-resistant, slate-inspired design, provides a versatile and attractive option for any architectural design.

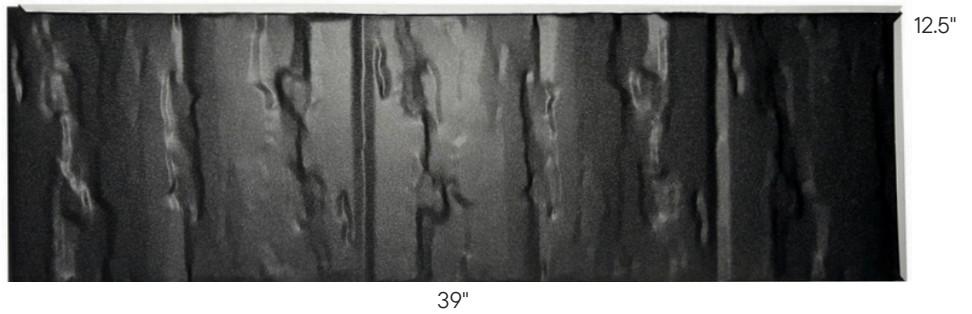

Features

- Roofing profile
- Concealed fasteners
- 26 gauge
- 40 year limited paint warranty
- Direct to deck installation
- Impact, weather and fire resistant
- Offered in textured finish options
- 3/12 minimum roof pitch
- 55% Aluminum-zinc alloy coated steel

Ribbed Steel

Strength in every rib.

Ribbed steel is a versatile material used for both roofing and siding, known for its strength, cost-effectiveness, sustainability, and aesthetic appeal. The engineered ribbed design enhances the structural integrity of the panels, providing exceptional durability and resistance to harsh weather conditions, including heavy winds and impacts. This resilience ensures a long lifespan with minimal maintenance, making Ribbed Steel a cost-effective choice over time.

Additionally, Ribbed Steel panels are made from recycled materials and can be fully recycled at the end of their service life, supporting sustainable building practices. Their reflective properties also contribute to energy efficiency by reducing cooling costs. Ribbed Steel panels offer a clean, modern look that can complement various architectural styles, available in a range of colours and finishes to suit diverse design preferences.

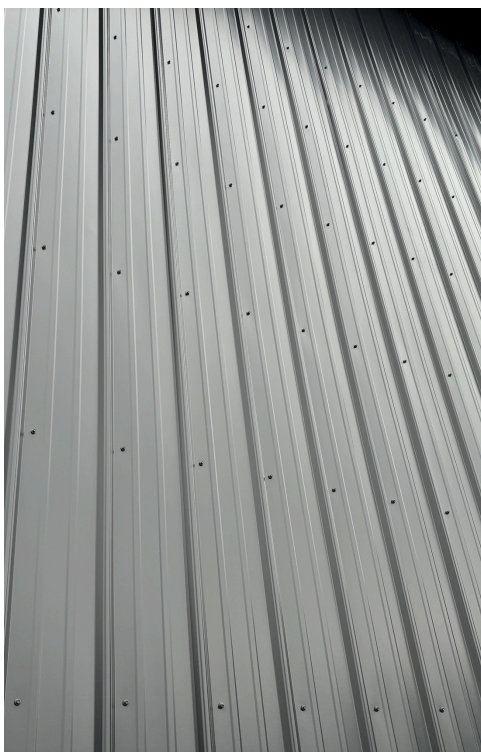

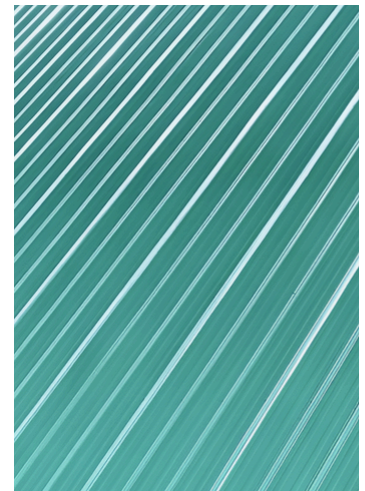

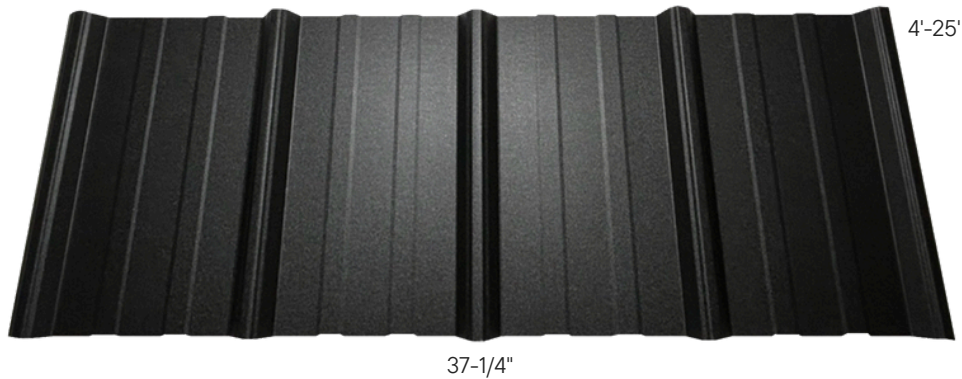

Features

- Roofing and siding profile
- Concealed fasteners
- 29 gauge
- 40 year limited paint warranty
- Direct to deck or strapping installation
- Impact, weather and fire resistant
- Offered in textured and gloss finish options
- 3/12 minimum roof pitch
- 55% Aluminum-zinc alloy coated steel

Corrugated

***Rippled metal panels for a
unique look.***

Corrugated Sheet Metal is a highly practical and popular choice for both roofing and siding, offering numerous benefits including strength, cost-effectiveness, sustainability, and aesthetic versatility. The distinctive corrugated pattern not only enhances the material's structural resilience, providing excellent durability and resistance to severe weather conditions, but also contributes to efficient water runoff. The durability of these panels ensure a long lifespan with minimal maintenance, making it a cost-effective option for various construction projects. From a sustainability standpoint, Corrugated Sheet Metal is manufactured from recycled materials and can be fully recycled at the end of its life, reducing environmental impact. Its reflective properties help in reducing energy consumption for cooling. Corrugated Sheet Metal provides a rugged, industrial look that can be adapted to both modern and traditional architectural styles, available in a variety of colours and finishes to meet diverse design preferences.

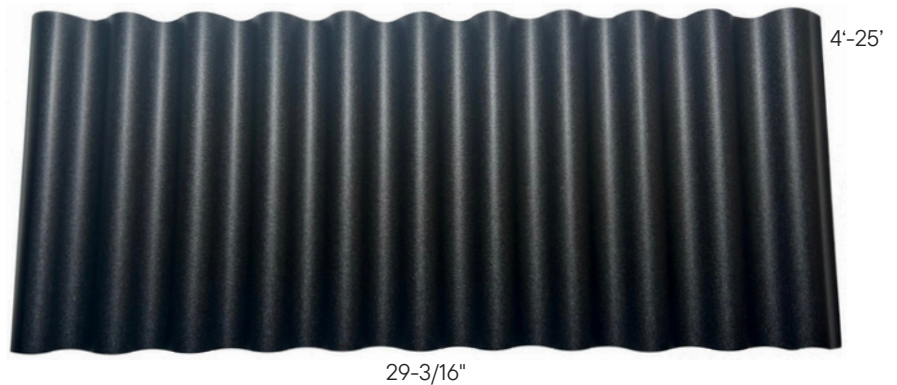

Features

- Roofing and heavy duty siding profile
- Concealed fasteners
- 26 gauge
- 40 year limited paint warranty
- Direct to deck or strapping installation
- Impact, weather and fire resistant
- Offered in textured and gloss finish options
- 3/12 minimum roof pitch
- 55% Aluminum-zinc alloy coated steel

Modern Plank Siding

Timeless beauty of real wood.

Modern Plank metal siding offers a blend of strength and beauty, making it a popular choice for contemporary architectural designs. Constructed from resilient metals such as steel or aluminum, our Modern Plank metal siding provides exceptional strength and durability against harsh weather conditions, ensuring long-term durability with minimal maintenance. Its cost-effectiveness lies in both its initial affordability and the reduced need for repairs or replacements over time. From a sustainability perspective, our Modern Plank metal siding is made from recycled materials and is fully recyclable at the end of its lifespan, reducing environmental impact. Metal siding's inherent energy efficiency helps to lower heating and cooling costs by reflecting sunlight and reducing heat transfer. Modern Plank metal siding offers clean lines and a variety of textures and finishes, allowing for versatile design options that can enhance the visual appeal of any building facade.

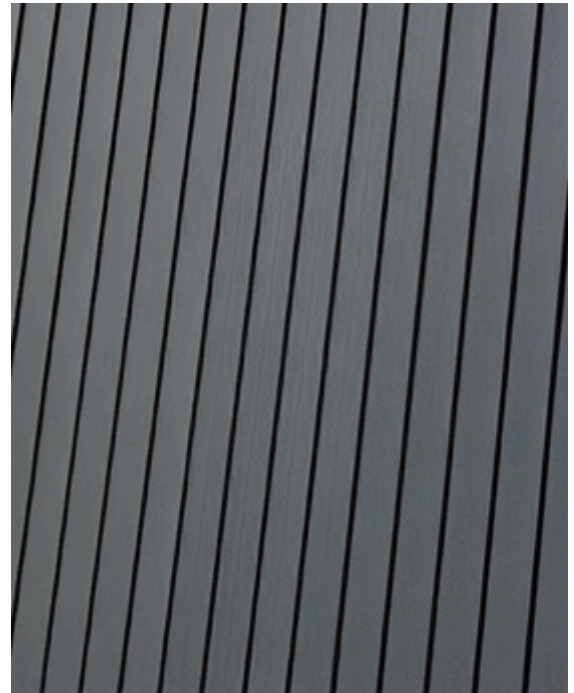

Features

- Siding profile
- Concealed fasteners
- 24 gauge & 25 gauge
- 40 year limited paint warranty
- Impact, weather and fire resistant
- Offered in textured and woodgrain finish options
- Exceptional stain resistance and adhesion
- Direct to deck installation
- 55% Aluminum-zinc alloy coated steel

Board & Batten Siding

***Eyecatching lines and shadows for
A lasting appeal.***

Board & Batten metal siding is a versatile and durable option that combines strength and aesthetic appeal. This style of siding features wide, vertical panels (boards) with narrower strips (battens) covering the seams, creating a distinctive and rustic look. Board & Batten siding offers exceptional strength and resistance to harsh weather conditions, ensuring longevity with minimal maintenance requirements. Its durability translates into cost-effectiveness over time, reducing the need for frequent repairs or replacements. These panels are inherently fire and mold resistant as well. Board & Batten panels are manufactured from recycled materials and are fully recyclable at the end of their lifespan, contributing to reduced environmental impact. These siding panels provide a timeless appeal that can complement various architectural styles, offering a range of colours and finishes to suit both traditional and modern designs.

Features

- Siding profile
- Concealed fasteners
- 24 gauge & 25 gauge
- 40 year limited paint warranty

Hidden Vent Soffit

***Combining aesthetics with
functionality.***

Hidden Vent Metal Soffits offer a combination of aesthetics and functionality, making them a popular choice for architectural detailing. These Soffits feature concealed ventilation slots that provide airflow while maintaining a seamless and clean appearance. Made from durable metals like aluminum and steel, Hidden Vent Metal Soffits provide resistance to weather elements, ensuring long-term durability with minimal maintenance requirements. Their durability contributes to cost-effectiveness over time, as they are less prone to damage and deterioration compared to other materials. These Metal Soffits are manufactured from recycled materials and can be fully recycled at the end of their lifespan. They offer a sleek and modern look that enhances the overall appearance of buildings, available in various colours and finishes to match different architectural styles and preferences.

Features

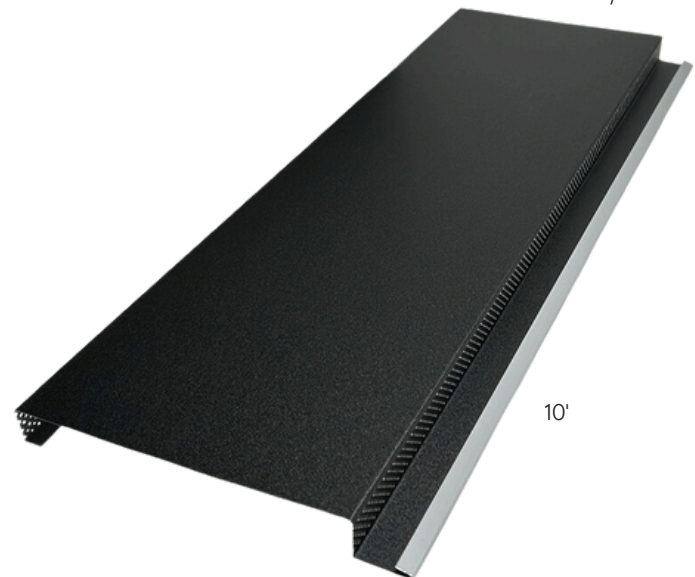

- Soffit profile
- Concealed fasteners
- 24 & 26 gauge
- 40 year limited paint warranty
- Impact, weather and fire resistant
- Exceptional ventilation
- Offered in textured and aluminum finish options
- 55% Aluminum-zinc alloy coated steel
